Letter of Recommendation

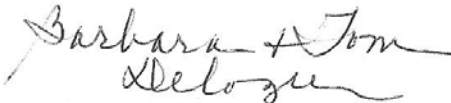

We met Bob and Paul at the Hobe Sound Art Show about a month ago. We have a ClearView screen on our door between our condo and garage in MI and we were anxious to get one on our home in Ft. Pierce. We were so pleased to find a local installer at the show. We immediately connected with the professionalism and enthusiasm of these two gentlemen and signed up to get a quote.

Bob called ahead and set an appointment and showed up to do the measurement exactly when they said they would—which we have found not to be the case when dealing with home repair vendors in FL. Coming from the north, it seems that practically no one here does what they promise. These two were the exception! And we also decided to get a quote for not only the door into the house, but for the garage door as well.

Well, we had our installation today of our retractable motion screen on our garage door. We decided to go with the whole garage door installation versus the man-door rolling screen because it just made more sense to us. That way if we are working in the garage, we can have the door open and keep the bugs out! We are thrilled with the installation and the precision workmanship. Bob and Paul are adamant that their work be as close to perfection as possible. They are professional, friendly and take their work seriously. And they know their product!

My husband and I would highly recommend them to anyone considering either of these products. The retractable rolling screen works perfectly and we are ecstatic with the quality of the product and their installation. If you are thinking about having a screen installed, please use them!

Sincerely,
